Computers and Records Seized of Dr Gatti and Dr Montanari (<https://www.ageofautism.com/2018/02/computers-and-record-seized-of-dr-gatti-and-dr-montenari.html>)

(<http://www.rescuepost.com/.a/6a00d8357f3f2969e201b7c9527662970b-pi>)

By John Stone

The computers, records and data of Antonietta Gatti and Stefano Montanari have been seized by the Italian "Guardia di Finanza".
Sanevax comment: (<https://www.facebook.com/sanevax.inc/posts/2024722697556363>)

BREAKING NEWS: This morning two scientists from Italy lost their computers, records, and data - all confiscated. Dr. Gatti and Dr. Montanari have been studying the potential effects of micro- and nanoparticles used in vaccines on the human body for years. One of them was scheduled to testify in court regarding an alleged vaccine injury. Several conference presentations were also scheduled over the next few months. Now, there is no data to present. Coincidence? Or, suppression of inconvenient scientific findings?

The website of vacciniinforma.it (<http://www.vacciniinforma.it/2018/02/23/guardia-di-finanza-nel-laboratorio-della-dott-ssa-gatti-e-montanari-la-medicina-ostacolata-come-sempre/5580>) reproduces the facebook page of Dr Montanari with the comment "FINANCIAL GUARD VISIT THE LABORATORY OF DRS GATTI AND MONTANARI, MEDICINE IS OBSTRUCTED AS USUAL".

No one, of course, challenges the pharmaceutical industry in order to make money but the cozy relationship (<https://worldmercuryproject.org/news/fast-tracking-mandatory-vaccination-government-media-muzzle-scientists/>) of the industry to the Italian government (<https://www.ageofautism.com/2017/12/john-stone-presents-written-evidence-to-uk-parliament.html>) is well documented, and this will be a contentious event in the forthcoming Italian national election.

A groundbreaking study "New Quality-Control Investigations on Vaccines: Micro and Nanocontamination (<http://medcraveonline.com/IJVV/IJVV-04-00072.pdf>)" by Gatti and Montanari was published in the International Journal of Vaccines and Vaccination early last year:

Abstract

Vaccines are being under investigation for the possible side effects they can cause. In order to supply new information, an electron-microscopy investigation method was applied to the study of vaccines, aimed at verifying the presence of solid contaminants by means of an Environmental Scanning Electron Microscope equipped with an X-ray microprobe. The results of this new investigation show the presence of micro- and nanosized particulate matter composed of inorganic elements in vaccines' samples which is not declared among the components and whose unduly presence is, for the time being, inexplicable. A considerable part of those particulate contaminants have already been verified in other matrices and reported in literature as non biodegradable and non biocompatible. The evidence collected is suggestive of some hypotheses correlated to diseases that are mentioned and briefly discussed.

John Stone is UK (and European) editor of Age of Autism.

Comments

Autism is on a dramatic rise. No controls were done for the combined vaccine MMR, which is the basis for all scientific work. This was revealed in the Congressional hearings regarding safety. The VAXXED documentary shows a Real scientist pursuing the truth he found in the data, and who was castigated and ridiculed for his work. Gatti's and Montanari's work does have a control; the one animal vaccine had no metal particulate matter. Their work needs to be pursued, and reproduced. True scientists should be doing this for the sake of understanding and vaccine safety.

With the seizing of Gatti's and Montanari's work we see a concerted effort to block scientific research that is detrimental to the pharmaceutical agenda. There are many scientists not controlled by the pharmaceutical companies that can and should pursue this study. They too will be attacked and ridiculed, but it is the only way to get the truth.
